

Vibra-Probe™

Pinpointer Metal Detector **585**

Features

- **Communicates with vibration** - When a target is located the Vibra-Probe signals with pulses of vibration.
- **Pulse Induction (PI)** - This technology allows hunting at the beach in salt water or in any type of soil, including black sand.
- **Detection depth stability** - New advanced circuitry maintains the detectors detection depth ability throughout the life of the battery.
- **Target direction** - The Vibra-Probe 585 detects at the tip only, not along the shaft, enabling precision target pinpointing.
- **Target distancing** - The pulses of vibration will continue to increase in quantity as the tip gets closer to the target.
- **Automatic tuning** - The state of the art microprocessor controlled design requires no adjustments of any kind.
- **Tilt On/Off** - No push button switches. The Vibra-Probe 585 turns on and off when pointed upward, or will automatically turn itself off one minute after the last detection.
- **Waterproof** - Unique sealed design can be used in almost any environment including fresh or salt water to a depth of 100 feet. This makes the Vibra-Probe an ideal tool when searching in water.
- **Low battery indicator** - Built in low battery sensor alerts you when the battery is low and needs replacing.
- **Easy battery installation** - The standard nine-volt battery is quickly changed without tools. Simply rotate the rear knob and pull out the compression seal to access the battery compartment.
- **Solid construction** - The Vibra-Probe's rugged sealed construction and stainless steel hardware are built to last.
- **Holster** - Includes belt mountable holster for easy carrying.

Designed For Any Environment!

The Vibra-Probe 585 Pinpointer metal detector is like a miniature version of a primary detector.

It communicates through vibration, incorporates Pulse Induction (PI) technology, and is waterproof to a depth of 100 feet (30m).

The Vibra-Probe is fully automatic. The self-calibrating microprocessor-controlled circuitry requires no adjustments of any kind.

No push button switches. The Vibra-Probe uses our unique tilt on & off technology, in addition to our traditional one-minute automatic-off battery saver.

The simple to use design, and modern electronics, make it easy to locate elusive targets in any environment including mud, dirt, grass, black sand, and even fresh or salt water.

The included belt holster makes it easy to carry, so it's always at the ready.

MSRP - \$159.95

Vibra-Probe 585 Specifications

Detection Type	• Pulse Induction
Search Mode	• All metal
Overall Length	• 14 inches (35 cm)
Coil Diameter	• 1 inch (2.5 cm)
Weight	• 8 oz. (227 grams)
Power	• Standard 9 volt battery
Warranty	• 1 year
Battery	• Included
Holster	• Included

Specifications are subject to change without notice.
